

# SEAP Gurukul

A program that creates "Next Gen" leaders by **Cross-Mentorship!**\*

Connect with Thought Leaders and aim to be one!  
Launching the Second Edition in September 2020.

\* Being mentored by a senior leader from another organization

## Message from SEAP President

Over the years, SEAP has represented the aspirations of the IT industry in Pune and has created various platforms to address the Government-Industry / Industry-Academia / Startup-Enterprise initiatives. The most recent successful example is 'PuneConnect', focused to bring the start-ups community to the fore! Further, in developing and fostering the young leadership of our IT ecosystem, this year we want to bring yet another aspirational platform 'Gurukul 2.0' to our industry in a big way!

- **Ashwin Megha**  
SEAP President

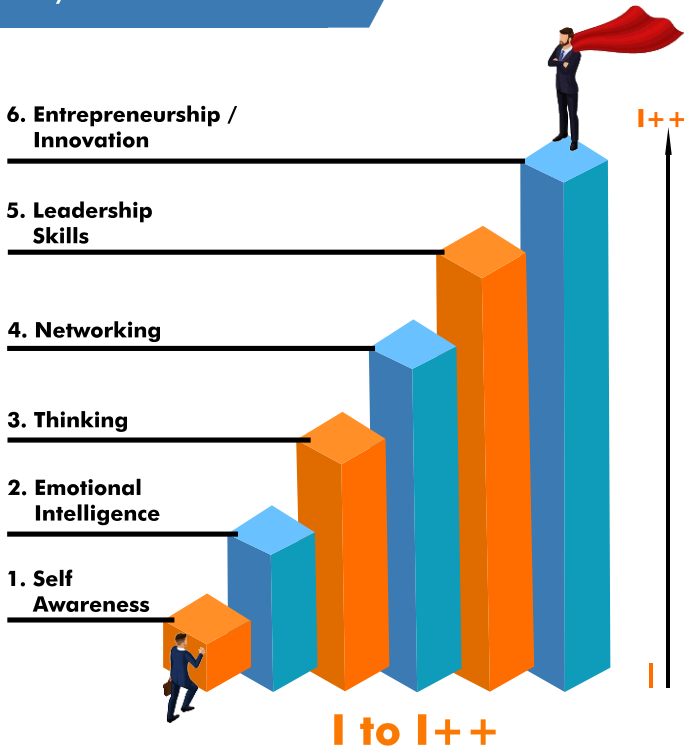

## Message from Program Director

SEAP has been at the forefront in various aspects since its inception. Mentorship is not a new word to the industry, but SEAP realized that enterprise mentorship was a white-space, and it can leverage the fantastic CxO ecosystem to build the future leaders in IT. The Gurukul program is another step towards achieving our aim. The cross-enterprise mentorship program will open up new avenues for aspiring leaders, thus enabling Pune to grow and create a benchmark.

- **Abhijit Atre**  
SEAP EC Member

## Journey of Future IT Leaders

When I started interacting with my mentor, Dr. Shridhar Shukla, the conversations significantly helped me understand my limiting beliefs, acknowledge and improve upon my strengths and focus on using my energy and skills to yield best of the results that brought me closer to my objectives. The discussions refined my thoughts and approach towards executing things.

Different sessions conducted as part of training and the discussions there after were instrumental in giving a good orientation. Mentorship not only helped me align my thoughts and efforts, but also got me the camaraderie of such fantastic individuals participating in the programs and sessions.

- Sameer Kshatriya  
Director Of Engineering

**I to I++ is a concept designed by SEAP Gurukul for developing "future leaders". Veterans guide and nurture the future leaders with different aspects of industry leadership to help them get to the next level in their career.**

I was fortunate to be part of the first batch of SEAP Gurukul program. I want to thank my mentor Mr. Prashant Pansare for his time as well as valuable insights in this program. It was a pleasure to learn from him. I continue to take guidance from him even beyond this program. In our regular lives, we hardly get a chance to interact with business leaders beyond our own organizations. However, this program gave me the opportunity to interact and have open conversation with my mentor Mr. Prashant Pansare. In these conversations there were no boundaries, barriers, preconceived notions or any vested interests. The only objective was to help me expand my horizons and grow as a business leader. My mentor advised me to read some interesting books, helped me to connect with other business leaders as well as guided me in challenging myself. I really enjoyed this entire learning process.

- Abhijeet Joshi  
Director - Service Delivery
